Instructions: Roper Wallet Interior
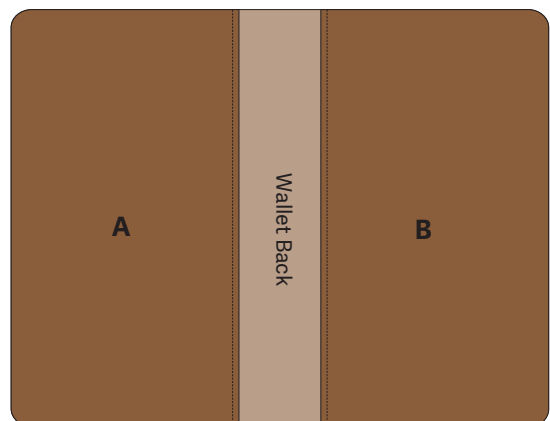

| Back Panels	Side Panel	Front Panel

1 Tool, stamp, stain, and finish the wallet back, if desired, before installing pockets.

2 Apply 1/8" contact cement to the 3 borders with rounded edges on the flesh side of pockets A, B and C, as shown below in green.

A
(Flesh Side)

B
(Flesh Side)

C
(Flesh Side)

3 On the flesh side of flap D, apply 1/8" of contact cement to the outside edges, as shown below in green.

4 Stick pocket A and B down to the flesh side of your wallet back, making sure to align the outside edges and corners, as shown.

C

5b.

6

After sticking down pocket C, stick flap D on top of pocket A, making sure the bottom and left edges align, as shown in Step 6a.

D

A   =   D

6a.

When you finish sticking down pockets C and D, your project should look like this.

D   C

6b.

7

Lace or stitch around the perimeter of the wallet. See our lacing and stitching guide for further direction. Congrats! You're finished!
